

SOC Project Rubric Alignment

Incident Response 1 Final Submission (6 pts)

- IR Environment Setup: Wazuh+ELK installed on ParrotOS; macOS agent logs; Wireshark with filters; Volatility setup
- Incident Detection & Analysis: Simulated login attempts analyzed; alerts triaged; MITRE mapping used
- Incident Response & Containment: VirtualBox isolation; firewall setup; evidence tools (Wireshark, Volatility); playbook created
- Digital Evidence Management: Volatility, disk imaging, timeline creation, chain of custody maintained
- IR Documentation & Reporting: IR playbook, tracking, full report, tool documentation
- Post-Incident Procedures: VM snapshot restore, root cause analysis, checklist, and process improvement

Security Monitoring 1 Project Submission (4 pts)

- Monitoring Environment Setup: Wazuh/ELK on ParrotOS; logs from macOS and ParrotOS; alert rules and routing via Kibana
- Security Event Analysis: Multiple log types analyzed; event correlation; detection timeline and triage
- Monitoring Implementation: Architecture diagram; 3+ data sources; baseline metrics and health checks
- Security Reporting: Alerts, metrics, Kibana dashboards, final security report with recommendations
