

Cybersecurity Prep Summary

Cybersecurity Acronyms Cheat Sheet

CIA Confidentiality, Integrity, Availability

CVE Common Vulnerabilities and Exposures

IOC Indicator of Compromise

TTP Tactics, Techniques, and Procedures

MITRE ATT&CK Framework of attacker behavior

APT Advanced Persistent Threat

(See earlier PDF for full list)

Top 7 Cybersecurity Incidents

1. SolarWinds (2020): Supply chain backdoor infected U.S. agencies
2. Exchange Hafnium (2021): 4 zero-days exploited at scale
3. Colonial Pipeline (2021): Ransomware shutdown fuel supply
4. JBS Foods (2021): Double extortion disrupted meat supply
5. Capital One (2019): SSRF exposed 106M records
6. MGM Resorts (2023): Social engineering + MFA fatigue
7. MOVEit (2023): File transfer zero-day used by CI0p

Key Cybersecurity Concepts Explained

Zero-day: Unknown flaw exploited before patches exist

MFA Bypass/Fatigue: Attackers trick users or abuse weak factors

Supply Chain Attack: Hacking vendors to reach target orgs

Ransomware & Double Extortion: Encrypt + leak threats for payment

Lateral Movement: Moving inside network after breach

Cloud Misconfiguration: Poor cloud settings allow data exposure

Sample Entry-Level Cybersecurity Jobs (June 2025)

- ARKA Group (Danbury, CT): SOC Analyst (hybrid/remote possible)
- New Light Technologies (Remote): Jr. Cyber Security Analyst
- Shriners Childrens (Remote): Cyber Security Analyst I
- IJM (Remote): Fall 2025 Cybersecurity Intern
