

INCIDENT RESPONSE 1 CHECKLIST (6 ITEMS)

1. IR Environment Setup

- ☐ Install Wazuh Manager on Parrot OS (VirtualBox)
- ☐ Install Wazuh Agent on macOS and connect to Manager
- ☐ Configure log collection from Parrot OS and macOS
- ☐ Create 3 custom alert rules
- ☐ Install and configure Wireshark on Parrot OS
- ☐ Install Volatility on Parrot OS
- ☐ Document all setup steps

2. Incident Detection and Analysis

- ☐ Analyze macOS + Parrot OS logs in Wazuh
- ☐ Investigate 1 suspicious login attempt
- ☐ Classify 3 security incidents using a severity matrix
- ☐ Document all methods and findings

3. Incident Response and Containment

- ☐ Simulate and isolate compromised VM in VirtualBox
- ☐ Implement basic firewall rules in Parrot OS
- ☐ Preserve evidence (memory dump, pcap, artifacts)
- ☐ Create containment playbook

4. Digital Evidence Management

- ☐ Capture live system state on Parrot OS
- ☐ Perform memory analysis with Volatility
- ☐ Acquire disk image
- ☐ Maintain chain of custody

5. IR Documentation & Reporting

- ☐ Create incident response playbook
- ☐ Build an incident tracking spreadsheet or log
- ☐ Write a full report for 1 incident
- ☐ Document all tools and usage steps

6. Post-Incident Procedures

- ☐ Create VM recovery procedure
- ☐ Conduct root cause analysis

- ☐ Build a recovery checklist
- ☐ Write IR process improvement notes

SECURITY MONITORING 1 CHECKLIST (4 ITEMS)

1. Monitoring Environment Setup

- ☐ Install Wazuh or ELK-based monitoring system
- ☐ Collect logs from 2+ source types
- ☐ Create 3 alert rules
- ☐ Set up alert workflow

2. Security Event Analysis

- ☐ Analyze 3 types of logs
- ☐ Correlate 2 sources
- ☐ Develop 1 full detection scenario
- ☐ Document triage process

3. Monitoring Implementation

- ☐ Create architecture diagram
- ☐ Integrate 3 data sources
- ☐ Define performance baseline
- ☐ Set up health checks

4. Security Reporting

- ☐ Write alert documentation
- ☐ Collect security metrics
- ☐ Write a summary report
- ☐ Create a dashboard
